

KHODOR GHALAYINI

Electrical & Electronic Security Systems Engineer | Technical Project Manager

Abu Dhabi, UAE | +971 55 924 3006 | khodor04@gmail.com | linkedin.com/in/khodor-ghalayini | <https://khodor04.github.io/>

Open to relocation to New Zealand — Green List eligible (ICT Project Manager, ANZSCO 135112)

PROFESSIONAL SUMMARY

Electrical and computer engineer with 11+ years of experience delivering large-scale CCTV/VMS, access control, intercom, barrier and key management systems for government and enterprise environments. Strong background in system design, IP networking, server and NVR architecture, commissioning, fault diagnosis and project delivery. Managed programmes across 15+ sites, supported 5,000+ devices and cameras, led 30+ engineers and technicians, and managed portfolios valued above AED 5M. Certified across Avigilon, Genetec, Milestone, Pelco and Digifort platforms. PMP certified with IELTS General Band 8.

KEY SKILLS

Security Systems & Platforms

- CCTV & VMS architecture, design and migration — Milestone XProtect, Genetec Security Center, Avigilon ACC/Unity, Pelco VideoXpert, Digifort
- Access control, intercom, barriers, ANPR and key management — Nedap AEOS

Project & Programme Management

- Project planning, BOQs, technical submittals, requirements management and acceptance documentation
- Vendor coordination, budget/portfolio management (AED 5M+), stakeholder and client management — PMP certified

Network & Infrastructure

- IP networking, VLANs, managed switching, fibre connectivity, 10 Gbps server connectivity
- Server, NVR, storage and recording architecture; bandwidth and capacity planning

Operations & Compliance

- Testing, commissioning, acceptance and handover; root cause analysis and incident recovery
- Preventive and corrective maintenance planning; MCC and SIRA compliance documentation

Leadership & Reporting

- Technical team leadership (30+ engineers/technicians), training and quality control
- Power BI, Power Query, DAX, SQL, advanced Excel, VBA, Power Automate, Office Scripts, MS Project

PROFESSIONAL EXPERIENCE

Technical Project Manager | *Site Technology, Abu Dhabi, UAE*

Jul 2019 - Present

- Lead end-to-end delivery of enterprise physical security and ELV programmes covering CCTV/VMS, access control, intercom, barriers and key management across 15+ sites.
- Translate client and consultant requirements into system architecture, design reviews, equipment schedules, IP addressing plans, BOQs, technical submittals, commissioning plans and acceptance documentation.
- Provide technical governance for environments supporting 5,000+ devices and cameras, including VMS servers, NVRs, storage, network switches, fibre uplinks and operator workstations.
- Act as the main escalation point for complex incidents. Lead structured fault isolation across cameras, servers, networks, databases and third-party integrations, then coordinate permanent corrective action.
- Plan and manage phased upgrades and migrations, including recording-server replacement, network changes, parallel operation, testing and cutover activities designed to protect recording continuity.
- Direct 30+ engineers and technicians across multiple sites, covering work allocation, technical guidance, quality inspections, safety, progress control and recovery planning.
- Manage vendor and supplier engagement for technical compliance, integration constraints, pricing and support across project and maintenance portfolios valued above AED 5M.
- Deliver operator and client training, including sessions for Abu Dhabi Police users, and prepare SOPs, manuals, as-builts, test records and handover packs.

- Conducted site surveys and developed integrated designs for analogue and IP CCTV, access control, intercom, barriers, X-ray systems and related ELV technologies.
- Prepared BOQs, technical proposals, system architecture diagrams, equipment selections, method statements and MCC-aligned documentation.
- Configured and troubleshoot cameras, VMS platforms, recording servers, access control panels, network connectivity and third-party system interfaces.
- Coordinated preventive maintenance, emergency response and corrective works to maintain system availability across client sites.
- Led on-site technical teams during installation, testing, commissioning and defect rectification, and produced progress reports, manuals and final handover documents.

SELECTED PROJECT EXPERIENCE

- **Enterprise CCTV platform upgrade:** Led the phased replacement of obsolete Avigilon recording servers in an environment supporting approximately 1,330 cameras. Coordinated 10 Gbps fibre connectivity, VLAN routing, server migration, redundancy checks and parallel operation to protect service and recording continuity.
- **Multi-site physical security delivery:** Managed CCTV/VMS, access control, intercom, barriers and key management systems across 15+ sites and 5,000+ devices, supported by a technical workforce of more than 30 engineers and technicians.
- **Parking and vehicle access integration:** Designed and troubleshoot integrations between ANPR cameras, vehicle barriers, loop detectors, safety loops and relay controls to support automated authorised access.

EDUCATION

Bachelor of Engineering in Electrical & Computer Engineering | American University of Beirut, Lebanon | 2009 - 2014

CERTIFICATIONS AND TRAINING

- Project Management Professional (PMP)
- Milestone Certified Design Engineer (MCDE)
- Genetec Security Center Certification
- Avigilon ACC 7 Certification
- Pelco VideoXpert Certified Solutions Specialist
- Digifort IP Surveillance Software - Enterprise
- AEOS by Nedap - Training
- Cybersecurity diploma and training
- Google Data Analytics Professional Certificate

LANGUAGES

Arabic: Native | English: IELTS General Band 8
